JOURNEY WITH OUR CLIENT

About two years ago, Shannon Pittman, Managing Director of Business Development, began working with a nonprofit organization to fill their CFO position. As a result of this opportunity, Pittman developed a professional relationship with the company's CEO and has worked with them since.

In September 2021, Pittman caught up with the CEO and Finance Manager of the company and discussed a need for 10 Internal Auditors. They had an upcoming project that would provide relief for leases and contracts for their tenants; our client needed additional support. This project was funded by the Department of Housing.

Originally, our client asked us to provide 10 qualified candidates for this project. As time went on, additional candidates were requested – CFS has placed 21 temporary candidates so far.

NOTE: This project is ongoing and will likely continue for the next few years. COVID-19 has impacted thousands of people and our client has ~600 housing communities to account for.

QUOTE FROM CFS

"I am so grateful that [Client] trusted me and CFS to help with such a large-scale project for their organization. We met on several occasions to discuss the specifics and how we could best service their need – and quickly. They have been a delight to work with, always stay in strong communication and have continued to come to us for support as the project grows. We look forward to helping with this project long-term and with any additional needs that arise in their department."
